

### Distinctive

The BXB EDC Conference system is the distinctive new face of digital conference management. It creates a real sense of harmony with even the most luxurious conference venues. This is also reflected in the even, clear sound from its hidden speaker and the balance it strikes between innovative design and advanced performance. It also offers inherent ease of use. There is simply nothing else like it.

Everyone in the conference chain can enjoy the benefits. The BXB EDC system guarantees reliability and compatibility during conference preparation, control and participation. With the BXB EDC system you can relax. Your meeting is in good hands.

1. Connection testing function

2. Setting speaking mode:

- 1-9 speaking mode
- Open conference
- Chairman only
- Override function

3. Voice control

### Sophisticated

Even just opening the ingenious cover creates that feeling of dealing with something special. A perfect mix of design and technology: sophistication in looks and performance. The intuitive layout of the sleek control panel has an instantly familiar feel. And the application of advanced acoustical and display technology makes it easy to hear and read exactly what's going on. All of this puts users at ease, and in control. And that's good news for your business. With BXB EDC system you benefit from years of expertise in conference systems. You have the reassurance of a reliable, established partner for all your requirements. When you think conference, think BXB.

### Simple creation of even the most advanced network

The BXB EDC system emphasis on standard connection greatly simplifies system expansion. All EDC elements use the same cabling, so adding elements or changing the configuration is easy and uncomplicated. This allows a system and its functionality to be easily matched to the exact needs of a specific venue, operation and control actions are the same regardless of system size, and important benefit for system operators and users alike.

### Digital versatility in conference management

The BXB Conference system has already earned global recognition for its versatility, and the BXB EDC system continues the tradition. It is compatible with all existing BXB EDC system products, and its clever design allows it to be used both table-top or flush mounted. On its most basic level it gives delegates facilities for speaking and listening. It also provides a complete range of microphone control possibilities, which brings structure and order to meetings. Yet it offers much, much more as well.....

### Sweet design

BXB consider easy to install and easy to operate are essential for small to medium conference room. In this way, BXB put extra 40W \* 2 amplifier function into EDC1050 Main control unit. Besides, microphone 1 and 2 plug in main control unit also have broadcasting priority function to fulfill all needs. It will also cut down the cost and maximum the profit margin.

### Simultaneous interpretations for international gatherings

The BXB EDC system provides comprehensive facilities for generating and distributing simultaneous interpretations to conference participants. The BXB EDC system can handle up to a maximum of 8 simultaneous interpretation language channels.
